

# Meeting 11

Date: 16/05/2016

Facilitator: Jonathan

Participants: Tuyen, Emil, Jonathan, Tove, Alex

## Objectives (5 min).

- *What is left?*
- *What to do beside programming.*

...

## Reports (15 min).

- *Jonathan, refactoring.*
- *Alex, My courses list.*
- *Emil, Thumbnails in LessonList and search functionality.*
- *Tove is working on implementing hats.*
- *Tuyen is working on implementing teachers.*

...

## Discussion Items (35 min).

- How to implement teacher / student users.
- Refactor packages.
- Use cases.
- Create tests.
- Create a design model.
- Write in the RAD.
- More sequence diagrams.
- Write on the report.
- One bus to listen to events. Or individual listeners.
- Move viewHolders into the corresponding adapters.

...

## Outcomes and Assignments (5 min).

- *Emil will look at an abstract adapter to refactor some of the code from the individual adapters. Write on the report.*
- *Jonathan will look at use cases, sequence diagram, write SDD. Write on the report.*
- *Alex, design. Design lists. Look at handling cases where the user is not logged in.*
- *Tove and Tuyen implement hats and teachers. Write test. Refactor viewHolders into adapter. Solve dependencies, get rid of red arrows in Stan.*

## Wrap up!

→ Next meeting Thursday 19/05/2016 after meeting with Joachim.
